

GREEN CAMPUS POLICY

The institution combines environment friendly practices with education to promote sustainable and eco-friendly environment in the campus. The green campus concept offers the student and staff members an opportunity to develop for a healthy and salubrious working place.

POLICY SCOPE

The policy is applicable for all the students, teaching staff, non-teaching staff, administrative staff and all other in the institution.

OBJECTIVES

- To maintain maximum green cover inside the campus.
- To maintain a clean and litter free campus.
- To mitigate various types of pollution in the campus.
- To have more and more lung space for better health.

GREEN INITIATIVE

- Carry out regular green and energy audits.
- Restrict the entry of automobiles inside the campus.
- Encourage usage of bicycles and e-vehicles among students and faculty community.
- Encourage and motivate students to do projects on e-vehicles.
- Encourage walking among students and faculty using pedestrian pathways.
- Provide colored waste bins for disposal of waste.
- Free of plastics usage inside the campus.
- More tree plantation drives inside and outside the campus to enhance the green cover.
- Move to renewable energy sources to reduce the carbon foot print.
- Conservation of water resources by reusing the waste water.
- To start an “ev- club” to ensure active participation of students.
- Implement the 3R (Reduce, Reuse and Recycle) policy in the campus.
