

4. GREEN CAMPUS POLICY

The institution combines environment friendly practices with education to promote sustainable and eco-friendly environment in the campus. The green campus concept offers the student and staff members an opportunity to develop a healthy and hygienic work place.

4.1 SCOPE

The policy is applicable to all students, teaching and non-teaching and administrative staff working in the institution.

4.2 OBJECTIVES

- To maintain maximum green cover inside the campus.
- To maintain a clean and litter free campus.
- To mitigate various types of pollution in the campus.
- To give an extended lung space for better health.

4.3 GREEN INITIATIVES

- Carry out regular green and energy audits.
- Restrict endangering entry of automobiles inside the campus.
- Encourage usage of bicycles and e-vehicles among students and faculty community.
- Encourage and motivate students to do projects on e-vehicles.
- Encourage walking practice among students and faculty using pedestrian pathways.
- Provide colour coded waste bins for disposal of categorized waste.
- Controlled usage of plastics inside the campus.
- Continue Tree plantation drives inside and outside the campus to enhance green cover.
- Move to renewable energy sources to reduce the carbon foot print.
- Conservation of water resources by reusing waste water.
- To ensure active participation of students in “Ev- club”.
- Implement the 3R (Reduce, Reuse and Recycle) policy in the campus.
