

6. WASTE MANAGEMENT POLICY

The Waste Management Policy of the Karpagam Institute of Technology outlines the Institution's commitment to minimize its negative environmental impacts. The campus works to achieve a Zero Waste discharge strategy in order to achieve its Eco-friendly status through the "Reduce, Reuse and Recycle" policy.

6.1 OBJECTIVES

- Waste reduction, reuse and recycling.
- Reducing the amount of waste.
- Keeping natural resource utilization to minimum.
- Cleaning up waste and properly discarding it to decrease pollution.
- Encouraging and guaranteeing the efficient provisioning of waste services.
- Conduct awareness campaigns to make sure that relevant stakeholders are aware of how mismanagement affects their health, well-being and environment.
- Creating awareness of waste minimization problems.
- Ensure environmental protection through efficient waste management practices.
- Promote waste-to-energy possibilities through initiatives and academic research.
- Ensure segregation of waste at source.
- Develop a culture of sustainable waste management at the Institute through training faculty members, non-teaching staff, students and other staff members.
- Encourage partnerships with government organizations, businesses and NGOs to upgrade sustainable practices in the campus.
